pet_happiness: 3

home_inspiration: 2

luxury: 1

Queue state after run

ready: 46

rejected: 54

Safety locks

interest_publishing_global_stop: True
pcie2_publish_enabled: False
no_pins_published_during_run: True

Recommendations

- Wire pcie2-creative-intelligence as a pre-flight gate inside the assembler so every new draft is scored before it ever reaches `ready` status.
- Schedule a daily diversity-log rotation to evict signatures older than 30 days.
- Surface the dashboard link in the Pinterest Recovery dashboard for one-glance status.
