

Pinterest Account Recovery Wave v1 – Initial Scan

Generated 2026-06-26T15:05:01.969624Z · Verdict RED · Publishing LOCKED

Regain Pinterest algorithm trust and restore organic distribution. Quality before quantity.

Trust Score

33/100

Publisher Quality	0
Account Health	50
Pins Classified	5
Classification Counts	{"Average": 5}

Phase 1 – Production Scan

Safety Locks	{"pinterest_video_auto_publish": false, "pcie2_publish_enabled": false, "pinterest_publishing_global_stop": true}
Guardian	gray (publish gate closed)
OAuth Healthy	False
OAuth Scopes	(none)
Missing Scopes	catalogs, ads
High/Critical Legacy Findings	0

Blockers

- guardian_gray
- oauth_unhealthy_or_missing
- missing_scopes:catalogs,ads

Phase 5 – Recovery Strategy

Active Week	1
Safe Velocity	0 pins/day
Required Trust	60
Required Health	75
Publish Allowed	False

Safe Ramp Plan

Week	Max pins/day	Trust $\geq$	Health $\geq$	Status
1	3	60	75	ACTIVE
2	5	70	80	locked
3	8	80	90	locked
4	12	90	95	locked

Canonical Pipeline (single publisher guarantee)

- AI Engine
- pcie2_publish_queue
- pcie2-publisher
- Guardian Publish Gate
- Quality Firewall
- Pinterest API

Decision

DO NOT PUBLISH. Remediate blockers, then re-scan.

Remediation Plan

- Re-OAuth Pinterest with catalogs + ads scopes (currently both missing).
- Run guardian-sentinel-run to refresh Guardian status from gray to green.
- Manually archive the 19 banned-phrase pins flagged in the prior forensic report.
- Verify Pinterest Tag + CAPI events landing for /products/ pages (sample 10).
- After 14 days of zero-spam publishing, re-evaluate trust score gate (≥ 60 to start Week 1).

Self-Healing & Learning Loop

Every 6h via pinterest-recovery-learning-loop cron (job 221).
