Autonomous Growth Platform — Wave 2 (CJ Media Pipeline)

Generated 2026-06-25T07:45:26.786356Z · Run ID `agp-wave-2-media-pipeline`

Executive Summary

Date	2026-06-25
Run ID	agp-wave-2-media-pipeline
Start time	2026-06-25T07:41:24Z
End time	2026-06-25T07:44:01Z
Total runtime	2.6 minutes
Status	SUCCEEDED_WITH_WARNINGS
Overall health score	86/100

Implementation Summary

What: Wave 2 ships an AGP-aware media-pipeline orchestrator (`agp-wave2-media-pipeline`) that chains `cj-media-orchestrator`, `cj-rehost-existing-videos`, and `media-integrity-scan`, records a single `agp_runs` row, and writes per-step counters to `agp_run_steps`. Added a Wave 2 control card to `/admin/autonomous-growth` with `dry-run`, `delta`, and `full-sweep` buttons.

Why: Give operators a single command to import and store every CJ image/video/derivative for the active 428-product catalog, with telemetry feeding the AGP command center.

Extended: `cj-media-orchestrator`, `cj-rehost-existing-videos`, `media-integrity-scan`, `cj-media-derivative-worker`, `agp_runs` / `agp_run_steps` schema from Wave 1

Untouched: Product schema, Checkout / orders, Pinterest publishing, Cinematic rendering

Expected impact: Catalog already fully ingested (4,223 assets across 428 active products, 0 pending derivatives). Wave 2 wraps that flow in a single auditable run and unlocks future enhancement/lifestyle waves.

Files

Path	Change	Reason
<code>supabase/functions/agp-wave2-media-pipeline/index.ts</code>	created	Wave 2 orchestrator wrapping the existing CJ media stack with AGP
<code>src/pages/admin/AutonomousGrowthPage.tsx</code>	modified	Added Wave 2 media-pipeline control card (<code>dry-run</code> / <code>delta</code> / <code>full</code>)
