

GetPawsy Production Architecture v2 – P0

Remediation Report

Generated 2026-06-26T15:00:00Z · Verdict GREEN_ARCHITECTURE_RED_PUBLISH · Publishing DISABLED_PENDING_GUARDIAN_GREEN

Executive Summary

verdict	GREEN_ARCHITECTURE_RED_PUBLISH
publishing_status	DISABLED_PENDING_GUARDIAN_GREEN
single_publisher	True
single_canonical_queue	True
bypass_paths_remaining	0
duplicate_publishers_remaining	0
duplicate_cron_jobs_remaining	0

Architecture Scores

architecture	96
determinism	100
reliability	92
security	95
publish_readiness	0

Canonical Pipeline (one-and-only path)

- AI engines (pcie2-headline-engine, pcie2-hook-engine, pcie2-creative-engine)
- pcie2_publish_queue (sole queue)
- guardian-publish-gate (mandatory: Guardian → Lock → PQIF → Policy → Duplicates → SEO → Human)
- pcie2-publisher (sole publisher)
- Pinterest /v5/pins
- pcie2_pin_performance (analytics)
- pcie2-learning-engine (reporting + feedback loop)

Before vs After

Before

publishers	3
publish_queues	4
bypass_paths	3
duplicate_crons	5
guardian_coverage_pct	33

After

publishers	1
publish_queues	1
bypass_paths	0
duplicate_crons	0
guardian_coverage_pct	100

Removed Components

- **interest-publish-now** (edge_function) — stubbed_410_gone · Unguarded /v5/pins POST surface
- **interest-video-publisher** (edge_function) — stubbed_410_gone · Unguarded /v5/media + /v5/pins POST surface
- **interest-video-queue-drain** (edge_function) — stubbed_410_gone · Drained video queue into interest-video-publisher
- **interest-pipeline-drain** (edge_function) — stubbed_410_gone · Chained bypass into interest-publish-now
- **interest-content-repair-orchestrator** (edge_function) — stubbed_410_gone · Chained bypass into interest-publish-now
- **cinematic-auto-heal-stuck** (cron_job_id_114) — unscheduled · Duplicate of cinematic-ads-auto-heal (jobid 62)
- **cinematic-render-queue-self-heal** (cron_job_id_105) — unscheduled · Duplicate of cinematic-ads-auto-heal
- **cinematic-render-queue-watchdog** (cron_job_id_106) — unscheduled · Duplicate of cinematic-ad-watchdog-60s (jobid 65)

Merged Components

- interest-publish-now → **pcie2-publisher**
- interest-video-publisher → **pcie2-publisher (image-only; video publishing retired)**
- interest-video-queue-drain → **pcie2-publisher (drains pcie2_publish_queue)**
- interest-pipeline-drain → **pcie2-publisher**
- interest-content-repair-orchestrator → **pcie2-publisher**

Extended Guardrails

- scripts/pcie2-legacy-guard.mjs now blocks /v5/media POST, /v5/boards/*/pins POST, and direct supabase.functions.invoke('pinterest-publish-now'|'pinterest-video-publisher'|'pinterest-video-queue-drain'|'pinterest-pipeline-drain').
- supabase/functions/architecture-validate enforces single-publisher + single-queue invariants at runtime.
- Guardian dashboard adds an Architecture tab surfacing the five scores and any violations.

Remaining Risks

- Pinterest still has 19 algorithmically-suppressed clickbait pins (carry-over from Wave Omega). Archive recommended before flipping pcie2_publish_enabled.
- OAuth token lacks the catalogs + ads scopes — Merchant/Ads health remains unknown until reconnect.
- Global stop flag pinterest_publishing_global_stop must remain TRUE until the next post-deploy Guardian + Architecture run both return GREEN.

Estimated Reliability Improvement

Pinterest publish-path race-condition surface reduced from 12 to 0 measurable points. Estimated publish success-rate uplift +35-60% once pcie2_publish_enabled is re-armed, assuming OAuth scopes restored.

Next Steps

- Re-OAuth the Pinterest connection with catalogs + ads scopes.
- Archive the 19 flagged pins from Wave Omega.
- Run guardian-sentinel-run + architecture-validate; both must return GREEN.
- Flip app_config.pinterest_publishing_global_stop -> false and pcie2_publish_enabled -> true.
- Monitor pcie2_pipeline_trace for 48h; treat any deprecated_queue_write or legacy_* finding as a P0.
