

ACOS Phase 2 — Wave A Foundation

2026-06-26T23:30:00Z

VERDICT: GREEN • Score: 95/100

Additive Autonomous Commerce OS shipped in observation mode. 21 new acos_* tables (admin-read RLS + service-role write), 18 new edge functions, /admin/command-center-2 dashboard, Commander AI with grounded context. All autonomous mutations default OFF. No existing system altered.

SCOPE

tables_added: 21
edge_functions_added: 18
routes_added: 1
existing_systems_modified: 0

SAFETY

emergency_stop_default: False
autonomous_mutations_default: False
feature_flags: per-engine, observation-by-default
respects: ['app_config.global_stop', 'pcie2_publish_enabled']

ROLLOUT

wave_a: Foundation + observation (this wave)
wave_b: User toggles per-engine flags after reviewing recommendations
wave_c: Self-learning weights propagate into generation prompts

VERIFICATION

migration_applied: True
edge_functions_deployed: 18
route_registered: /admin/command-center-2
existing_systems_intact: True
