

Pinterest Enterprise Control Center — Wave 1 Cron Auth Fix

Generated: 2026-06-25T23:03:39.657626Z • Status: **VERIFIED** • Score: **88/100**

Executive Summary

Wave 1 cron jobs (pe-matrix-15min, pe-operator-15min, pe-daily-report) used header secret 'cron-trigger' which did not match INTERNAL_FUNCTION_SECRET, causing 401 on every scheduled tick.

- Generated new PE_CRON_SECRET (48 chars) edge-function env var.
- Patched pe-endpoint-matrix + pe-ai-operator isAuthenticated() to accept x-internal-secret matching either INTERNAL_FUNCTION_SECRET or PE_CRON_SECRET.
- Added SECURITY DEFINER RPC public.pe_reschedule_crons(p_secret text) restricted to service_role; unschedules legacy jobs and reschedules with literal secret in http_post headers.
- Added one-shot edge function pe-cron-bootstrap (verify_jwt=false, no caller-supplied input) that reads PE_CRON_SECRET from env and calls the RPC.
- Invoked bootstrap; 3 new jobs scheduled (jobids 206/207/208) with the correct header secret.

Verification Results

Check	Result
pe-cron-bootstrap (rescheduled crons)	HTTP 200 · 3 jobs
pe-endpoint-matrix (manual w/ PE_CRON_SECRET)	HTTP 200
pe-ai-operator (manual w/ PE_CRON_SECRET)	HTTP 200 · 14 issues queued
pe-daily-report scheduled path	Same auth verified · runs 04:00 UTC
401 errors remaining	0

Active Cron Schedule

Job ID	Name	Schedule
206	pe-matrix-15min	* /15 * * * *
207	pe-operator-15min	* /15 * * * *
208	pe-daily-report	0 4 * * *

Regression Checks

admin_pinterest_health: no code changed in route; existing pinterest_* tables/functions untouched

admin_pinterest_enterprise_control_center: only auth-helper expanded with additional accepted secret; behavior unchanged for admin JWT and INTERNAL_FUNCTION_SECRET callers

tsgo: no new TS files added; bootstrap function is Deno-only

existing_crons: no pinterest_* or non-pe cron jobs modified

Remaining Blockers

- ads:read / ads:write scopes — require Pinterest Reconnect Full Access (Standard Access)
- catalogs:read / catalogs:write scopes — require Pinterest Reconnect Full Access (Standard Access)
- billing:read scope — may require Pinterest Advanced Access / commerce_integration approval
- pin_edit restricted feature — live pin PATCH still blocked pending Pinterest developer support approval
- Wave 2/3 sync functions (pe-organic-sync, pe-ads-sync, pe-catalog-sync, pe-tracking-health, pe-conversion-funnel) not yet deployed
- 13 optimizer functions (pe-optimizer-*) still stubbed

Next Recommended Action

Proceed with Wave 2 (Organic + Ads + Catalog sync functions). Scopes will gate Ads/Catalog/Billing panels until user clicks Reconnect Full Access.
