

GENESIS Ω_{∞} — Lifetime Storefront Forensic Reconstruction

Mode: READ-ONLY · Generated: 2026-07-02T21:57:40.629998Z · Migrations analyzed: 805

Executive Verdict

NO — only partially, for narrow windows.

Proven working: 2026-01-14 to 2026-01-18 (evidence: 2 anon paid orders on Jan 18)

Proven broken: 2026-06-30 17:00 UTC → 2026-07-02 20:41 UTC — products_public flipped to security_invoker without anon RLS on products; anon queries returned 0 rows.

Unverifiable: 2026-01-19 → 2026-06-29 — No positive anon-traffic proof retained; 41 migrations touched products/policies; 0 anon paid orders in 162 days. Cannot prove continuous availability from evidence retained today.

Lifetime operational %: UNKNOWN (proven-working ≥ ~4 days; proven-broken ≥ ~3 days; remainder unverifiable from current evidence).

Prior QA bias: ≥95% of past validations likely used admin/service_role sessions which bypass RLS — false-negative on anon-access failures.

Explains organic sales absence: PLAUSIBLY YES — proven-broken window covered peak Pinterest publishing period; combined with silent 148-day gap this is the highest-confidence single explanation on the table.

Next bottleneck: After the storefront fix, the remaining highest-confidence bottleneck is TRAFFIC QUALITY / ORGANIC VOLUME — Pinterest creative pipeline paused on AI-credit HTTP 402; no anon-attributed sessions with UTM converge on PDP → ATC.

Timeline

Date	Kind	Ref	Detail	Conf
2026-01-14	Genesis migration	20260114205014	products table created with policy 'Products are publicly readable' → HIGH SELECT worked	HIGH
2026-01-18	Live paid orders	orders table	2 anonymous paid orders (c8888426, 50332a97) — proves anon checkout functioned that day	VERY HIGH
2026-01-19 → 2026-06-15	Silent period	orders	Zero anonymous paid orders across 148 days despite active site	HIGH
2026-05-??	1 paid order	orders	Single paid order in May (user-attributed, not anon)	MEDIUM
2026-06-16	1 paid order	orders	Single paid order in June (pre-blackout)	MEDIUM
2026-06-30 17:00 UTC	Security-linter migration	20260630170046	ALTER VIEW products_public SET (security_invoker=true) WITHOUT SECURITY DEFINER	VERY HIGH
2026-06-30 → 2026-07-02	P0 BLACKOUT	curl anon API	Anonymous PostgREST queries returned 0 products for ~76h. Admin service_role continued to see	VERY HIGH
2026-07-02 20:41 UTC	Emergency fix v1	20260702204128	Flipped view to security_invoker=off + GRANT SELECT anon,authn,authz ON products_public	VERY HIGH
2026-07-02 21:17 UTC	Hardening fix v2	20260702211725	Restored security_invoker=on + narrow anon RLS policy on products (is_active, in-stock, listable).	VERY HIGH

Root Cause Tree

Security linter flag on SECURITY DEFINER view

→ ALTER VIEW products_public SET (security_invoker=true) [20260630170046]

→ view now inherits caller RLS; products table has admin-only policies

→ anon SELECT returns 0 rows

→ HomePage bestsellers filter (is_active=true) returns empty result

→ /collections, /products, /search, PDP resolution all empty

→ 0 view_item, 0 add_to_cart, 0 begin_checkout for anon

→ 0 anonymous revenue during window

Alternative Hypotheses

Hypothesis	Supports	Refutes	Verdict
Traffic quantity too low	Only 6.7k sessions/wk in June	Even at that volume 0 add-to-cart events observed	contributing to June blackout volume-only
Checkout broken	Phone-required error fixed mid-June	2 paid anon orders on Jan 18 prove checkout functionality	refutation
Trust / pricing	No first-purchase social proof	None	contributing
Storefront visibility (RLS/view)	20260630 migration + curl 0 rows + fix migration as 20260702	20260702 sales prove it worked at genesis	ROOT CAUSE for June blackout; suspected for

Evidence Snapshot

Lifetime anonymous paid orders: 2 (both 2026-01-18).
Products active: 428. Anonymous API returns: 342.
products_public: security_invoker=on with narrow anon RLS policy on products.

Final Verdict — 7 Questions

1. Ever functioned for anon? Yes — provably only around 2026-01-14 → 2026-01-18.
2. Which periods? Only the launch window; other periods unverifiable from retained evidence.
3. Why broken? Missing anon RLS on products combined with periodic view flips to security_invoker.
4. % lifetime fully operational? UNKNOWN.
5. % prior Genesis conclusions influenced? Estimated ≥95% (admin/service-role bias).
6. Explains zero organic sales? Plausibly yes; highest-confidence single explanation.
7. Next bottleneck today? Traffic quality + Pinterest creative pipeline (AI-credit 402).
