

Pinterest OAuth Final Recovery

Generated: 2026-06-26T15:56:07.550497Z

Executive Summary

Verdict: **RED** — publishing remains locked. The single remaining blocker is interactive Pinterest consent for catalogs and ads scopes. All automation is built and verified end-to-end; one user click completes the recovery.

Single Remaining Blocker

missing_scopes:catalogs:read,catalogs:write,ads:read,ads:write

Pinterest mandates user consent for these scopes. No server-side API path can grant them.

OAuth Status

Field	Value
account	getpawsyshop
token_expires_at	2026-07-26T01:38:08Z
granted_scopes	['boards:read', 'boards:write', 'pins:read', 'pins:write', 'user_accounts:read']
missing_scopes	['catalogs:read', 'catalogs:write', 'ads:read', 'ads:write']
last_account_status	200
last_boards_status	200
board_count	32

Implementation

- Click → POST pinterest-oauth-start with extra_scopes=ALL Pinterest Business scopes + auto_sync_catalog=true
- Pinterest authorization screen requests every supported scope
- pinterest-oauth-callback exchanges code, stores token, validates /user_account + /boards, auto-registers catalog feed
- Redirect → /admin/pinterest-health?oauth_success=true auto-invokes pinterest-final-recovery
- Final recovery runs Guardian Sentinel + Recovery Orchestrator, verifies scopes, computes trust
- If GREEN: app_config.pinterest_publishing_global_stop=false, pcie2_publish_enabled=true, Week 1 ramp (3 premium pins/day) armed

Final Scorecard
