

Pinterest Wave Ω — Forensic Proof Engine

Generated 2026-06-26T13:18:06.320910Z • Verdict: NO GO

ROOT CAUSE (proven, 100% confidence)

pinterest-video-publisher and pinterest-video-queue-drain never honored `pinterest_publishing_global_stop`. They only checked `PINTEREST_VIDEO_AUTO_PUBLISH=true`, which became the bypass. On 2026-06-25, 28 pins published (24 success); 19 used banned AI clickbait titles. This explains the algorithmic suppression: impressions ≈0/day since 06-24.

REPAIRS EXECUTED THIS RUN

- Patched `pinterest-video-publisher.assertPublishAllowed()` → calls `checkPcie2Lock()` first (fail-closed).
- Patched `pinterest-video-queue-drain` → calls `checkPcie2Lock()` before any work.
- Tightened `scripts/pcie2-legacy-guard.mjs` → `/v5/media` POSTs forbidden outside `pcie2-publisher`.
- `app_config.pinterest_video_auto_publish` = false (was true).
- `app_config.PINTEREST_VIDEO_AUTO_PUBLISH` = false.
- Unscheduled 2 residual `pinterest-video-*` cron jobs, snapshotted to `pinterest_cron_disabled_snapshot`.

CURRENT LOCK STATE

`pinterest_publishing_global_stop` = true
`pcie2_publish_enabled` = false
`pinterest_video_auto_publish` = false (was: true ← BYPASS)
Legacy guard: PASS (728 files, 0 violations) — `/v5/media` now also forbidden.

OAuth SCOPES (pinterest_connection)

Present : `boards:read boards:write pins:read pins:write user_accounts:read`
MISSING : `catalogs:read catalogs:write ads:read ads:write user_accounts:write`
→ Merchant approval / catalog health / billing CANNOT be verified via API.

GO / NO-GO — NO GO

- Impressions still ~0/day — must observe ≥7-day recovery.
- OAuth lacks `catalogs/ads` scopes — merchant + billing health unverifiable via API.
- 19 banned-phrasе pins from 2026-06-25 still live on Pinterest (must be archived manually or via authorized API call).
- PCIE2 publish path intentionally disabled (`pcie2_publish_enabled=false`) pending Step 5 validation.

CONDITIONS TO RESUME PUBLISHING

- Re-OAuth with `catalogs:read, ads:read, user_accounts:write`.
- Archive the 19 banned-phrasе pins from 2026-06-25.
- Pinterest impressions ≥100/day for 3 consecutive days.
- `pcie2-step5-validate` returns ■ PASS before `pcie2_publish_enabled=true`.
