

Pinterest Traffic & Ads Forensic Report

Account: **getpawsyshop** · Verdict: **RED** · Generated: 2026-06-26T19:44:02.481954+00:00

1. Executive Summary

All six Pinterest ad campaigns on ad account **549770199501 (GetPawsy, NL/EUR)** are ACTIVE with 5 APPROVED ads, but **every ad group is funded at €0**. Pinterest's analytics endpoint returns an empty result for the last 7 days, confirming zero impressions, zero clicks, and zero spend. The Pinterest conversion tag exists and is ACTIVE but has **never fired**, and CAPI outbox is empty for 7 days. OAuth is fully healthy with all 18 scopes granted through 2026-07-26.

2. OAuth Health

BUSINESS account 'getpawsyshop', 30 boards, 188 pins, website getpawsy.pet. Token valid, all required scopes granted (ads, billing, catalogs, boards, pins, user_accounts, biz_access). /user_account, /boards, /ad_accounts all return 200.

3. Ads Account Health

Ad account 549770199501 'GetPawsy', country=NL, currency=EUR, permissions=OWNER. **Flag:** currency=EUR while campaign names reference US targeting — confirm this is intentional.

4. Billing

GET /ad_accounts/.../billing_profiles → **401 commerce_integration restricted**. Pinterest will not expose billing fields to this app. Status of payment method, outstanding balance, and spending_disabled = UNKNOWN_API_LIMITATION. Manual verification required at <https://ads.pinterest.com/billing>.

5. Campaign Delivery

6 ACTIVE campaigns, 6 ACTIVE ad groups (all CLICKTHROUGH billable), 5 APPROVED ACTIVE ads. **Every ad group has budget_in_micro_currency = 0 EUR**. Analytics for the last 7d: [] (0 impressions, 0 clicks, 0 spend across all campaigns). Campaign 626758435781 has no ads attached.

6. Organic Delivery

0 pins published in the last 30 days. Publishing is locked by global_stop=true and pcie2_publish_enabled=false (deliberate safety lock from prior recovery wave).

7. Website Attribution

Last 7 days: 33 pinterest_funnel_events (30 product_view, 3 page_view, 0 add_to_cart, 0 begin_checkout, 0 purchase). 44 attribution sessions seen. **0 utm_session_log rows with utm_source=pinterest** — confirms no Pinterest-tagged inbound traffic.

8. Pinterest Tag + CAPI

Conversion tag 'Pinterest Tag' (id 2612820116727) is ACTIVE but last_fired_time_ms = **null** — it has never received an event from this account. 0 CAPI outbox events in 7d. SafePinterestTag component is mounted in the app, so the cause is upstream (no Pinterest-sourced sessions to fire the tag).

9. Catalog / Merchant

1 catalog: 'Retail catalog' (id 4812802272679), country=US, type=RETAIL, locale=en-US, last updated 2026-06-04. Feed status not queryable through current scopes — verify manually in Catalogs UI.

10. Root Cause

Primary [G] — Campaign budget/bid issue. Six ACTIVE campaigns with 5 APPROVED ads and €0 budget on every ad group cannot deliver. The 0-impression, 0-spend analytics matches this exactly. **Secondary [L]** Pinterest Tag/CAPI dormant (no inbound Pinterest sessions to fire it). **Secondary [O]** Billing readability blocked by Pinterest commerce_integration restriction. **Secondary [H]** Organic distribution intentionally paused.

11. Action Plan

P0 Set ad-group budgets in Ads Manager (manual, mutates). **P0** Verify billing/payment method at <https://ads.pinterest.com/billing>. **P0** Add an ad to campaign 626758435781 or pause it. **P1** Validate conversion tag firing once paid traffic arrives. **P1** Confirm destination URLs carry `utm_source=pinterest`. **P1** Confirm NL/EUR ad account is intentional for US traffic. **P2** Unlock canary organic publishing after ads deliver.

12. Safety

Read-only run. 0 mutations. No pins published, no ads modified, no budgets changed, no catalog changes, no OAuth changes, no `app_config` writes.

13. Final Scorecard

Overall **40/100** · architecture 70 · performance 15 · reliability 50 · automation 60 · scalability 60 · security 85 · maintainability 75 · ai_readiness 65 · growth_readiness 20.
