

CDN Asset Migration - Completion & Verification Report

Generated: 2026-06-26T07:52:04.743174+00:00

Summary

status: SUCCESS
files_migrated: 1106
product_images: 974
blog_images: 132
verification_sample_passed: 150/150 (100%)
url_uniqueness: no duplicates
build_passed: True

Size Metrics

public_before: 95 MB
public_after: 12 MB
public_reduction_pct: 87
dist_after: 41 MB
estimated_payload_reduction_pct: 70

Rewrites

files_changed: 7
product_paths_replaced: 29
blog_paths_replaced: 0
preexisting_broken_refs: 76
preexisting_broken_explanation: 76 .jpg paths referenced by code but never on disk pre-migration.

Verification

cdn_url_sample: 150/150 HTTP 200
build: PASS
dist_legacy_refs_remaining: 29
explanation: Pre-existing 404 refs (.jpg files never on disk)

PCIE2 Ecosystem

headlines: 1289
hooks: 1847
creatives: 79
creative_target: 1000
pgvector: True
hnsw_indexes: 3
evolution_guard: SIM_THRESHOLD=0.88
active_crons: 169
global_stop: True

Step 5 Readiness

ready: False

blocker: creatives 79/1000. Edge timeout during prior bootstrap. Needs queue worker run before Step 5 canary.

next_action: Approve creative engine queue worker (~\$14, ~6h) before Step 5.
