

PCIE2 Controlled Migration — HALTED at Phase 2 (readiness fail)

Generated 2026-06-26T06:09:46.338416Z

VERDICT: HALT — DO NOT enable PCIE2. Readiness gate FAILED.

Executive Summary

Phase 1 Legacy Audit	PASS — 0 publish-capable legacy paths remain.
Phase 2 PCIE2 Readiness	FAIL — 3 RED blockers (headlines=0, creatives=0, traces=0).
Phase 4 Snapshot	PASS — id aef3d102...
Phase 9 Trace Schema	APPLIED — 13 provenance columns added.
Canary (Phase 5–8)	BLOCKED — cannot run without creative briefs.
Rollback	One-action (restore from snapshot row).

Phase 1 — Legacy Audit Evidence

legacy_function_stubs	pinterest-automation + pinterest-live-pin-repair-execute return HTTP 410 Gone with code LEGACY_PUBLISHER_REMOVED
v5_pins_write_callers_outside_pcie2	0
remaining_v5_pins_callers_categorized	{'GET_only_analytics': ['pinterest-analytics-sync', 'pinterest-perf-backfill', 'pinterest-final-prod-audit', 'pinterest-pin-deletion-verify'], 'DELETE_only_cleanup': ['pinterest-diversity-cleanup-execute', 'pinterest-live-pin-repair-cleanup-duplicates', 'pinterest-pin-bulk-delete'], 'comment_or_doc_only': ['_shared/pinterest-config.ts']}
pinterest_publishing_global_stop	True
ci_legacy_guard	PASS (695 edge function files scanned, 0 violations)
active_pinterest_crons	0
verdict	PASS — no path can POST /v5/pins outside pcie2-publisher.

Phase 2 — Readiness Matrix

pcie2_product_understanding	428 rows · green
pcie2_headline_library	0 rows · RED · Publisher cannot select a headline. Gate fails closed.
pcie2_hook_library	24 rows · YELLOW · Sparse coverage across 18 functional classes.
pcie2_creatives	0 rows · RED · No creative briefs exist. Publisher has nothing to render.
pcie2_pipeline_trace	0 rows · RED · Pipeline has never run end-to-end. Cannot prove provenance.

pcie2_pin_performance	0 rows · yellow · No prior performance signal.
pcie2-publisher_function	- rows · green
pinterest_connection_oauth	- rows · green

Phase 3 — Feature Flag Diff (NOT APPLIED)

observed	{"pcie2_publish_enabled": false, "pcie2_pipeline_version": "1.0.0", "pinterest_publishing_global_stop": true, "pinterest_video_auto_publish": true}
action	NOT APPLIED. Flag normalization deferred until Phase 2 unblocks.

Phase 4 — Snapshot

snapshot_id	aef3d102-e6b9-4eb7-af39-df87227bea1f
taken_at	2026-06-26T06:08:41.957174+00:00
reason	pre_migration_baseline_2026-06-26
captures	['app_config', 'queue_counts', 'flag_state', 'legacy_guard_status']
rollback_instructions	UPDATE app_config SET value=jsonb_extract_path(snapshot.app_config, key) FROM pcie2_migration_snapshots snapshot WHERE snapshot.id='aef3d102-e6b9-4eb7-af39-df87227bea1f';

Phase 9 — Trace Provenance Columns Added

added	pipeline_id, creative_id, creative_version, ai_model_version, prompt_version, similarity_score, headline_version, hook_version, board_decision, publish_ts, deployment_sha, source_product_id, quality_score
--------------	--

Remediation Required Before Retry

- Run pcie2-headline-engine (or equivalent) to populate pcie2_headline_library — minimum 5 approved headlines per functional class × 18 classes = 90 rows.
- Run pcie2-creative-brief-generator across the 100 highest revenue_priority products to seed pcie2_creatives.
- Execute pcie2-publisher in `mode: dry\_run` for ≥25 products and confirm pcie2_pipeline_trace rows are written with all 13 provenance columns populated.
- Expand pcie2_hook_library from 24 to ≥50 (≥2 hooks per functional class).
- Re-run this migration with the same plan; Phase 2 must return all-green.

Recommended Next Action

- DO NOT flip pcie2_publish_enabled. Run the three remediation items above, then re-invoke the controlled-migration runbook.
