

Pinterest Live Verification & Root Cause Audit

Generated: 2026-06-26T02:29:31.654344Z

Verdict: FAIL — 100% of recent published pins were emitted by the LEGACY publisher. PCIE2 has 0 pipeline traces. Global publishing stop flag is ENGAGED, so no new pins are flowing through any pipeline. Low traffic is attributable to (a) the global stop preventing distribution since 2026-06-25 16:40 UTC and (b) historical legacy content quality issues (dup titles, CJ-host images).

1. Pipeline Split (last 250 pins)

Legacy %	PCIE2 %	Unknown %
100.0%	0.0%	0.0%

2. Publisher State

pininterest_publishing_global_stop	True
last_successful_publish_utc	2026-06-25T16:40:13Z
legacy_crons_disabled	17
active_pininterest_crons	0
sole_publisher_function	pcie2-publisher (idle — gates fail-closed pending creative briefs)
ci_legacy_guard	scripts/pcie2-legacy-guard.mjs (passing, 0 violations)

3. Content Audit

total	250
unique_titles	194
duplicate_title_pins	97
unique_images	229
cj_host_images	15
source_type_breakdown	{"lifestyle_ai": 73, "product_ai": 16, "cj": 94, "unknown": 67}
content_type_breakdown	{"product": 242, "lifestyle": 8}
top_boards	[["Best Cat Trees 2026", 84], ["Smart Pet Gadgets", 78], ["Cat Furniture", 20], ["GetPawzy Products", 1...
pins_without_pcie2_trace	250

4. Visitor Analysis

Distribution starvation. No pins published since global stop engaged ~16h ago. Historical pin pool has 22% duplicate titles and 6% CJ-host images, suppressing Pinterest algorithmic distribution. Add-to-cart event chain previously diagnosed (incident 2026-06-25) is still being rolled out.

Primary cause: publishing_halt

Secondary: legacy_creative_quality, duplicate_headlines, cj_host_images, atc_event_rollout_in_progress

5. Safe Auto-Repairs Executed

- Confirmed all 17 legacy crons remain unscheduled (snapshot intact)
- Verified CI legacy guard active in scripts/pcie2-legacy-guard.mjs
- No mutating writes performed (read-only audit + report)

6. Actions Blocked Pending Approval

- Disable global stop and run PCIE2 creative-brief backfill to enable PCIE2 publishing
- Hard-delete legacy publisher function directories (currently stubbed 410-Gone)
- Bulk-archive remaining legacy pins with duplicate titles or CJ-host images

7. Last 25 Published Pins (sample)
