

CEO Production Readiness Certification

GetPawsy · Mission First 100 Sales · 2026-07-03T09:42:36.857253Z

Final Verdict: READY FOR GROWTH — CONDITIONAL

Contingent on completion of the two owner-only external actions (Stripe DBA rename + Apple/Google Pay verification). Without those, verdict downgrades to NOT READY FOR GROWTH regardless of code posture.

Scorecard

Dimension	Score
Commercial	78
Technical	92
Security	98
Analytics	88
Traffic Quality	62
Conversion Readiness	71
Operational Readiness	84
Overall Ceo Readiness	82

Top 5 Bottlenecks

- Stripe DBA 'Skidzo' mismatch (100% checkout→paid loss)
- Zero organic acquisition velocity (near-zero verified humans/day)
- Apple Pay / Google Pay not verified on getpawsy.pet
- canonical_event_name enum missing page_view / collection_view
- Reviews hidden <3 → trust break above ATC on hero SKUs

Single Action → First Sale

Rename Stripe public business name + statement descriptor from 'Skidzo' to 'GETPAWSY'. Evidence: 18/18 real USD checkouts expired at Stripe hosted page over 7 days.

Single Action → First 100 Sales

Sustained daily Pinterest hero + evergreen cadence with PAIP v1 quality gate (already scheduled). No other single lever moves organic traffic at scale today.

CEO One-Week Plan

- Day 1 (owner): Rename Stripe DBA + statement descriptor → GETPAWSY. Verify Apple Pay domain. Enable Google Pay. Upload logo + brand color.
- Day 1 (auto): Confirm daily hero pin cadence running; unpause if halted.
- Day 2: Tighten shipping copy to 3–7 business days for US-warehouse SKUs. Seed 3+ authentic reviews on hero SKU.
- Day 3: Verify GSC + submit sitemap-index. Enable HIBP leaked-password check.
- Day 4: Wire abandoned-cart email (Resend) + basic post-purchase confirmation.
- Day 5: Extend canonical_event_name enum (page_view, collection_view) behind V13.1 audit.
- Day 6: Add sitewide trust bar + FAQ block on top-6 PDPs.
- Day 7: Review Mission Control + Executive War Room; publish CEO weekly digest; iterate hero pin creative from Real Human signal.
