Safety Gates (post-rollout)

pinetrest_publishing_global_stop = **true**
pcie2_publish_enabled = **false**
Gates were re-locked automatically by the orchestrator after queue drained.

Warnings

None.

Next Recommendations

- High:** Monitor impressions/clicks/saves on the 5 live pins for 48h before scheduling Wave 2.
Medium: Promote 350 drafts into queue in pacing-compliant batches once trust signals are stable.
Low: Add automated GPS-tracker dedupe at draft generation to prevent the duplicate-skip pattern.
