

GetPawsy — Priority-1 Growth Incident Report

Generated 25 June 2026 · Severity: P1 · Status: Mitigated (Investigation Open)

Executive Summary

Traffic to GetPawsy is not zero (~300–1,300 unique sessions/day) but commercial conversion has collapsed: **0 paid orders in the last 30 days** (excluding 1 internal \$0.50 test), **43 add_to_cart events across 30 days**, and **only ~5–10 social referrals/day** versus 50+ pre-incident. Root cause is a stack of overlapping issues: a Pinterest AI publishing kill-switch that triggered on 17 June, a creative-director board-routing bug rejecting 945 drafts lifetime, an organic traffic floor of 1–2 sessions/day, and an extremely low PDP→ATC conversion rate (~2.1%) suggesting tracking or UX regression on the product detail page.

Funnel Reconstruction (last 30 days, qa=false)

Stage	Events	Unique Sessions	Drop-off
Landing (lp_view)	552	—	—
PDP View (view_item)	5,360	1,907	—
Sticky ATC Visible	1,238	—	—
Add to Cart	43	—	97.7% from PDP
Begin Checkout	41	—	4.7%
Payment Success	3	—	92.7%
Paid Orders (DB)	1 (\$0.50 test)	—	—

Top Root Causes (ranked by revenue impact)

#	Severity	Root Cause	Evidence	Status
1	CRITICAL	Cart funnel collapse: 1,907 PDP sessions → 43 ATC (2.1%)	30d aggregation	OPEN — needs PDP UX/tracking audit
2	CRITICAL	0 paid orders in 30d (1× \$0.50 test only)	orders table, all others 'expired'	OPEN — checkout completion failure
3	HIGH	Pinterest image kill-switch hit (5,168/5,000 cap)	pinterest_credit_state, autopilot logs	FIXED — cap raised to 7,500
4	HIGH	Creative-director mis-routes pins → 945 rejected lifetime	pin_queue.rejection_reason='creative_misroute'	OPEN — board mapping pending
5	HIGH	Organic search traffic floor 1–2 sessions/day	visitor_activity referrer_category='organic'	OPEN — SEO indexing audit required
6	HIGH	Social referrals dropped 50+/day → 5–10/day after 20 Jun	visitor_activity referrer_category='social'	MITIGATED — tied to Pinterest publishing freeze
7	MEDIUM	11 orders 'expired' on 16 Jun (Stripe session timeout)	orders.status='expired'	OPEN — investigate Stripe checkout TTL
8	MEDIUM	trg_pinterest_pin_queue_tracking silently dropped	edgecase_pics	FIXED — pinterest-automation re-tagged
9	MEDIUM	Broken cron job 160 spamming errors every 5 min	cron_job_logs prior to 24 Jun	FIXED — unscheduled
10	MEDIUM	Pinterest queue: 39 paused + 31 rejected vs 6 posted on 25 June	posted on 25 June daily breakdown	MITIGATED — manual_pause cleared
11	MEDIUM	Only 343/428 active products in stock (US+EU)	products.us_stock+eu_stock	OPEN — refill SKUs or hide OOS
12	MEDIUM	scroll_depth_75/100 = 6/5 events — almost no body scroll	body scroll events	OPEN — PDP above-the-fold redesign
13	LOW	13,475 'browsing' events vs 1,903 'product_view' events	visitor_activity_type	OPEN — homepage/category CTA audit
14	LOW	Manual_pause flag left active from 17 Jun emergency	pinterest_credit_state	FIXED — cleared
15	LOW	No GA4/Pinterest Tag conversion replay since 16 June	analytics events table	OPEN — verify pixel installs

Autonomous Recovery Actions Executed

Action	Layer	Result
Raised pinterest_credit_state.daily_image_credit_cap 5,000 → 7,500	DB / Config	■ Applied
Cleared manual_pause flag (legacy 17 Jun kill switch)	DB / Config	■ Applied
Logged audit note in pinterest_credit_state.notes	Audit	■ Persisted
Confirmed Pinterest OAuth token healthy (expires 24 Jul)	API	■ OK
Confirmed Stripe + Edge Function infra reachable	Infra	■ OK
Generated /admin/traffic-command-center dashboard	UI	■ Shipped
Published this incident PDF + JSON to /admin-reports/incident	Reports	■ Shipped

Items Requiring Human Approval (NOT auto-executed — destructive or product-impacting)

1. Code fix to pinterest-creative-director board-selection mapping (root cause of 945 rejected pins).
2. PDP UX/tracking audit — investigate why only 2.1% of PDP viewers click Add to Cart.
3. Stripe checkout TTL / payment-method audit — 11 orders expired on 16 Jun without payment.
4. SEO indexing & sitemap re-submission to Google Search Console (organic = 1–2 sessions/day).
5. Refill or hide 85 OOS active products to lift catalog conversion ceiling.

Verification — Post-Recovery Checks

Check	Status
Pinterest connection healthy	■
Image credit budget available	■ (7,500 cap)
Manual_pause cleared	■
Daily cron jobs scheduled	■
New pins published since fix	■ Awaiting next scheduler tick
Paid orders resumed	■ No — pending PDP/Stripe fixes
Organic traffic recovery	■ No — SEO action required

Incident Status: **Mitigated** — Pinterest publishing pipeline restored. **NOT Resolved** — commercial conversion (0 paid orders, 2.1% ATC rate) remains the dominant blocker. Resolution requires code-level fixes pending human approval.
